

Press Release

8th May 2009

Fire Containment acquires Trafalgar Passive Fire Solutions

We are pleased to announce the acquisition of the Trafalgar Passive Fire Solutions business. This strategic acquisition allows Fire Containment to expand its already powerful product portfolio and grow its customer base.

Once fully integrated together, the new look Fire Containment Group will be clearly recognised as one of the leading suppliers of passive fire protection products & systems throughout Australia.

We have acquired some strong brands including the Trafalgar Access panels, both fire and non-rated, the Fyreplug fire pillows, Fyreflex fire resistant sealant and Fyreset fire mortar, products which we all know have pioneered Passive Fire Protection in Australia and which still today account for a large percentage of product of this kind sold throughout Australia.

Customers can be assured of continued supply of quality products and when the full integration is complete our customers can enjoy personal and high quality service backed by unparallel technical support.

We are purely a distribution business and installation of our products is through our growing network of approved and specialist passive fire protection contractors.

We stand by our company motto, "We Know Fire".

Call us on either the Trafalgar number, 1800 888 714 or the Fire Containment number, 1300 792 832 for your product needs or to be put in contact with an installer near you.
